

SIX MODULE TRAINING SCHOOL

This modular training course will further enable delegates to apply foundational skills into specific areas of need and further the development of those already actively involved in ministry. It is ideal for the development of church ministry teams and individuals alike, as delegates experience the healing touch of Jesus as they progress through the material. Teaching, practical training, workshops, assignments and assessments form part of the course and certificates are awarded upon completion. The course is led by Clive Corfield and training is held regionally to facilitate local people learning together while saving extensively on travel and accommodation costs.
